BILLING DATE	SERVICE DATES		METER READINGS		USAGE (IN CF)
	FROM	TO	PREVIOUS	CURRENT	

01/01/2016	11/01/2015	12/31/2015	2136	2146	1000
------------	------------	------------	------	------	------

Notice that the billing is typically about 60 days.

Water units are typically reported in cubic feet. A cubic foot is 7.48 gallons.

For this bill, you would multiply 1000 x 7.48 to determine the use in gallons: 1000 cf x 7.48 gallons = 7,480 gallons.

Divide 7,480 gallons by 60 to determine the average use per day: 7,480 gallons/60 days = 124.67 gallons.

Divide the total by the number of people in your home for the average amount of water used per person per day.

For example, if there are 5 people in your home, you would divide 124.67 gallons/5 people = 24.93 gallons per person per day.
