

Biobag

Biobag comes from a profound driving force to do better, as soon as we know better.

Established:
1993

Operates:
Worldwide

Industry:
Waste

Business Concept

- Produces certified compostable bags and products designed for food waste, yard waste, and organics collection
- Uses plant-based materials (such as starches and bio-polymers) instead of conventional petroleum plastics
- Supports municipal composting programs and household composting

Sustainability

- Certified B Corporation meeting high standards of environmental responsibility
- Products are compostable under ASTM and EN standards, breaking down into non-toxic components
- Helps divert organic waste from landfills, reducing methane emissions

B-Impact Score: Strengths

*80 qualifies for B Corp Certification, average is 50.9

- **Governance:** Mission Locked ✓
- **Workers:** Financial security ✓
- **Community:** Supply Chain Management ✓
- **Environment:** Land & Life ✓
- **Customers:** Customer Stewardship ✓

91.7

Brand Value and Economic Benefits

"We want to build products that support healthier soils and a healthier planet for future generations."

- Appeals to consumers, cities, and businesses committed to zero-waste goals
- Supports long-term cost savings by reducing landfill fees and contamination penalties
