Neighborhood Inventory Checklist

FOOD ACCESS

STEP ONE: Take an informal walk around your neighborhood to identify the streets or natural features that will set the boundaries for your inventory. Use one of the following scales:

1. My street (name)
2. 10 blocks (names of streets defining the area)
3. Half-mile radius with my house or apartment in the middle
4. 1-mile radius (like the [one-mile maps](#) of my school neighborhood)

STEP TWO: Print out this checklist or use your phone or tablet to make a detailed inventory of your neighborhood. You might also want to print out a screen shot from www.mywater.world to help you see from above what you are experiencing on the ground as you walk about. Take photo documentation of what you observe to use later in building your slide presentations.

Food Access

1. Distance (miles) to a large grocery store with fresh, organic produce
2. Distance (miles) to farmer's market or farm stand
3. Number of (and distance to) fast food restaurants
4. Number of (and distance to) culturally appropriate restaurants
5. Number of (and distance to) small convenience stores
6. Number of (and distance to) bars
